IACRB Certified Reverse Engineering Analyst (2020)

PERSONAL PROJECTS

Elder Frenzy Games (12/2020 - 2021)

- Working on a 3d game startup with my friends . Development under progress

STF(Security tools for fun) (2020 - 2021)

- STF is a collection of security tools,malwares,exploits that i made for fun . For example there is a malware that can achieve persistence by exploiting a flaw that affects code editor like vscode,vscodium which i found out . There is a malware that can use sound to communicate and even track people . It isn't public
